

MRC Variable Surface Tracking Test, Sunday, March 28, 2010

Six tracks were plotted on Saturday, March 27, 2010 at the DuPage County Government Center in Wheaton, IL. Sunday morning dawned. It was cold and windy. Rain threatened. But for one team, it was a perfect day!

Congratulations to new Champion Tracker, Dax, aka Bruinhaus Helle Raiser (Rottweiler, bitch) owned and handled by Dr William Snyder from Chesterfield, MI! Bill and Dax have traveled to Wheaton in search of this elusive title more than a few times. This trip, it all came together.

Dax will celebrate her 11th birthday in April! It has been reported that Dax did a beautiful job on the track, and from what we could see from across the street, that is totally accurate. First time VST tracklayer, Pam Kristoff, laid the passing track.

It was a great day for tracking. Two of the other teams came extremely close to passing, and I'm sure we will be reporting on two more CTs in the very near future.

I would like to thank our judges, Pam German and Wally O'Brien for plotting six wonderful tracks. I would also like to thank the angels who laid track: MRC members Pam Kristoff, Paul Childers, and Liz Hixon; Pecatonica Tracking Club members Penny DuBernat and Pat Schroeder. I am always humbled by the gift of time that tracklayers give to the sport.

We were also very pleased to have two non-tracking MRC Board Members join us. Karen Perry and Cindy Mann brought us a wonderful lunch on Saturday and came back to give us a helping hand on Sunday. I hope we were able to share our passion with them!

For those of you who like the details: we had 5 Rottweilers in the test with the sixth track going to a Rott wannabe (aka a Nott-Rott). There were 19 entries for the 6 tracks.
